

Unique needs – one ergonomic workstation

CONCEPT ERGO

TRESTON

Concept Ergo workstation

People are unique. Nevertheless, one workstation can fit everyone.

Treston's Concept Ergo workstation is height-adjustable in just a few seconds for various users and needs. This workstation offers ergonomics to all users and can be flexibly adapted to meet the needs of industrial working environments such as ESD, research and development, assembly, packing and logistics. Concept Ergo is built to last. It is sturdy, modular and functional - with functional design and modularity Concept Ergo can be updated when tasks change over the years.

Expand your ergonomics with Concept Ergo and provide the best working environment for your employees!

Concept Ergo features

- An ergonomic and versatile industrial workbench: workstation can be updated when tasks change over the years.
- Functional design and modularity: world's largest selection of modular accessories, over 500 accessories available.
- Various sizes and combinations available.
- Electric or Allen key height adjustment.
- Very stable steel frame, with a maximum load capacity of 500 kg.
- The frame, worktop, and accessories are available with ESD protection.

For frames with hand crank height adjustment or corner and extension solutions, please contact our sales team.

Fits all industrial working environments

The ergonomic Concept Ergo workbench can be flexibly adapted to meet the needs of individual people. All movements of the operator can be optimised, which in turn increases performance and productivity whilst also, decreasing work-related stress.

Concept Ergo fits virtually any environment, application and industry, from electronics and luxury item manufacturing to medical equipment suppliers (cleanroom suitability ISO class 7).

Modular design provides total integration with the existing system and the potential to flexibly adapt to changes in the environment. Concept Ergo's durability and functionality make it totally future-proof.

With the digital desk panel, it's easy to find your precise working height after the previous user or adjust the height for a new, different task.

The structure of the bench legs makes it possible to attach accessories to the legs, too.
