

Industry's first!

WICK Cutter

Experience a Whole New Level

No need for nippers for quick cuts

You can cut the wick without switching to nippers after solder removal, improving work efficiency.

Industry's first!
WICK Cutter

FT-630

Check here for
detailed specifications
and parts information.

Eliminate contamination issues!

After cutting, the wick debris (or sliver of wick) is collected in the wick collector, preventing them from scattering onto the workbench and eliminating contamination concerns.

Wick holding mechanism after cutting

The holding mechanism eliminates the need to manually pull and withdraw a new wick after cutting. You can also adjust the holding force.

Supports diagonal cuts

Diagonal cutting makes it possible to access narrow spaces.

ESD Safe

Work with confidence even in ESD-controlled environments.

Cut WICKS to any length

Compatible with WICK width from 0.7 to 3.8 mm, and cutting length from 2.5 to 30 mm.

Replaceable cutting blades

Blades can be easily replaced.
